

**FORWARD ON CLIMATE BAY AREA RALLY
February 17, 2013**

Why: To show President Obama broad public support for urgent action on climate change

Where: One Market Plaza in San Francisco – We will encircle the U.S. State Department office and demand that it rejects the Keystone XL tar sands pipeline

When: 1-3 PM Sunday, February 17, 2013

Who: **Everyone!** The Forward on Climate Rally will be the largest climate rally in Bay Area history!

To RSVP and for more information see www.350BayArea.org

President Obama has the power to lead an effort on the scale and with the urgency needed to phase out carbon-intensive fossil fuels and fire up energy efficiency and clean, renewable energy sources.

The way forward on climate is clear: the Administration must start cutting carbon from today's biggest polluters—power plants—and stop the Keystone XL tar sands pipeline to avoid more carbon pollution tomorrow.

The President needs to hear from you that this is one of your top priorities! Join us in San Francisco, to ask the President to move Forward on Climate!
